

IPLEX® G Lite Wind Turbine Inspection Kit Built for the Climb

With a portable, handheld videoscope that delivers high-quality images, the IPLEX G Lite Wind Turbine Inspection Kit includes everything you need for efficient and accurate gearbox inspections.

IPLEX G Lite Wind Turbine Inspection Kit
(Available in 4 mm or 6 mm diameters)

- IPLEX G Lite 2 m (6.6 ft) long videoscope
- AT120D/NF oil clearing tip adaptor
- 2 rechargeable batteries with external charger
- USB-adaptor for wireless live image sharing
- Ruggedized, all-weather protective carrying case

Built to Meet the Challenges of Wind Turbine Inspections

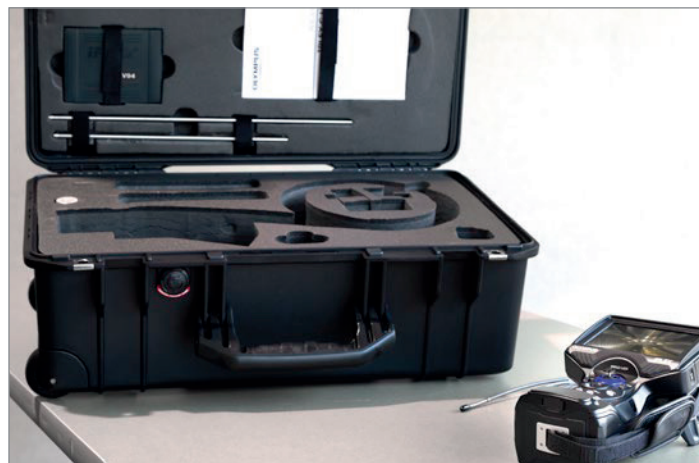

Go Anywhere

Weighing only 1.15 kg (2.5 lb), the IPLEX® G Lite videoscope is easy to carry up tower. Climb confidently knowing that this compact videoscope meets IP65 standards and US Department of Defense testing (MIL-STD) for protection against 4-foot drops, vibration, blowing dust, high humidity, salt fog, freezing rain, electromagnetic environments, and explosive atmospheres.

See Everywhere

Our exclusive oil clearing tip adaptors reduce cleaning time during inspections. Grooves on the edge of the tip use capillary action to draw oil away from the lens for a clearer inspection image.

Advanced video functions make your inspection fast and efficient. Capture still images during a video recording, bookmark key moments in the inspection video, and use the 30-minute autorecorded video to double check where you've been—don't worry about backtracking.

True to Your Image

The IPLEX G Lite videoscope is packed with advanced imaging features to help you capture high-quality images. See how clear your inspection results can be with the PulsarPic® processor for glare reduction, WiDER™ technology for optimized contrast, and dynamic noise reduction for enhanced clarity.
